THE POWER OF **CONNECTED**

MaskMate™ Particulate-Blocking Hood with STEDAIR® PREVENT

Our Newest Hood using STEDAIR® PREVENT with 99.9% Particulate-Blocking Efficiency

Our hood **keeps firefighters protected** so they can do their job comfortably, safely, and with the confidence of having the best particulate-blocking hood technology.

Despite advances in firefighting technology, fires remain incredibly complex and ultra-hazardous. While firefighters have always been exposed to dangerous smoke and fire gases containing a multitude of hazardous chemicals, the proliferation of modern materials including fire retardants, plasticizers, and other advanced chemicals has increased the risk for exposure to toxins that can both penetrate turnout clothing during the fire event and further adhere and remain persistent in clothing materials and components. A large number of these substances have been classified as carcinogens or are skin toxic, meaning that harmful exposures occur despite the use of respiratory protection.

More than ever, wearing the right type of protective gear when stepping onto the fireground **helps to keep firefighters safe** and hazards and injuries away.

Today, we are **proud to offer a technologically-advanced particulate-blocking hood**, made with **STEDAIR® PREVENT**. With a particulate-blocking efficiency of 99.9%, this fabric is especially designed to reduce exposure to carcinogenic particulates, while remaining air permeable and flame resistant.

FEATURES & BENEFITS

- Unique design that meets NFPA 1971 specifications
- Superior particulate-blocking thanks to **STEDAIR® PREVENT** technology
- Air permeable
- Full particulate coverage – particulate-blocking layer extends full length of hood
- Comfort top – no seam across the top of the head
- Wide-view face opening – Provides maximum field of view
- Knit-lined top – allows heat to escape
- 21” length crown to bib

Technical Information

Model	TPP	THL	Durability	Particulate Efficiency
Nomex®/ Lenzing®	22.8	427	>100 washings	99.9%
Nomex®	25.14	385	>100 washings	99.9%
PBI Lenzing	24.55	464	>100 washings	99.9%

Part No.	Description	Color
HD-NLPR-SQ HD-NLPR-SQ-B	Nomex®/ Lenzing®	White, Black
HD-NXPR-SQ	Nomex®	White
HD-PLPR-SQ	PBI®/ Lenzing®	Tan
